

HAWKESFIRE

PROTECTING LIFE. PROTECTING ASSETS. PROTECTING BUSINESS.

FIREHAWK FOAM CART

Your first line of defence for fires and spills.

The **FIREHAWK** foam cart is a portable, self-contained foam unit designed for rapid deployment in firefighting, industrial, and maintenance operations. It is built on a rugged, wheeled frame for easy transport and maneuverability, even in challenging environments. The cart features an integrated foam concentrate tank, variable inductor, and hose assembly, allowing operators to quickly apply a high-quality foam blanket for fire suppression, vapor control, or spill mitigation.

Constructed from corrosion-resistant materials, the unit is suitable for use with a wide range of foam concentrates, including AFFF, AR-AFFF, and new generation fluorine free foams. The ergonomic handle, large pneumatic tires, and balanced weight distribution ensure smooth movement over uneven surfaces. BS336 hose fittings make setup and operation fast and intuitive, reducing response time during critical situations.

Key Features:

- **Tank Capacity:** 150ltrs as standard (custom sizes available)
- **Construction:** Heavy-duty steel or stainless steel frame with chemical-resistant coating
- **Foam Compatibility:** Works with new generation SFFF Foam concentrates
- **Proportioner:** Adjustable inductor for precise foam concentrate mixing
- **Mobility:** Large pneumatic wheels and ergonomic push handle
- **Hose Assembly:** 15–30 m discharge hose with foam nozzle
- **Applications:** Firefighting, fuel spill control, chemical plant safety, marine operations, and more

Hawkes Fire specialise in mobile and fixed fire protection solutions for flammable liquid risks.

Our company was founded in 1974 and began business specialising in the service & maintenance of Fire Appliances. Things never stay still and opportunities arose in all aspects of fire so that Hawkes Fire is now seen as a market-leading “one-stop-shop” for our clients’ high hazard fire protection needs.

Based in Teesside and operating globally, our experienced team of Engineers offers the highest levels of service, whether a minor repair to a fire appliance, or a major overhaul of an on-site fire pump, our aim is to provide our clients with high-quality solutions at a competitive price. We also provide fully engineered systems to support the most complex of scenarios.

Working with our valued core suppliers such as Perimeter Solutions, FireDos & FlamePro, our experienced sales team supports our clients to supply a wide range of firefighting equipment to meet their needs.

From a length of hose to a turnkey project solution, we bring actual incident know-how to protecting high-hazard industries.
